IT Infrastructure Proposal

Prepared by: _____

Date: _____

1. Executive Summary

[Provide a concise overview of the proposal, project objective, and expected benefits.]

2. Current Infrastructure Assessment

- Overview of existing hardware and software
- Identified gaps and issues
- Summary of current risks/opportunities

3. Proposed Solution

3.1. Hardware

- Servers
- Workstations
- Networking Devices
- Storage Solutions

3.2. Software

- Operating Systems
- Productivity Tools
- Security Solutions

3.3. Network Infrastructure

- Topology
- Switches/Routers
- Firewall and Security Appliances

3.4. Cloud and Virtualization

- [Describe proposed cloud services/virtualization approach]

4. Implementation Plan

1. Project Phases
2. Timeline
3. Resource Allocation
4. Risk Management

5. Cost Breakdown

Item	Quantity	Unit Cost	Total Cost
[Hardware]			
[Software]			
[Services]			
Total			

6. Expected Benefits

- Improved reliability and performance
- Enhanced security
- Scalability
- Cost savings

7. Appendix

- Supporting Documents
- Technical Diagrams
- References
